training for students and corporate

This service is for the XII students and the corporate employees. We offer customized courses containing presentations, discussions and workshops. We conduct personal skill development programmes and sales-oriented workshops. Our faculty is dedicated and experienced. Our training focuses on improving various skills such as SMART skills, soft skills, basic computer skills etc. We train the participants how to handle corporate social responsibility, achieve sales effectiveness, adapt to work culture change, and become a part of corporate culture. After the completion of the training, the participants will be able to handle various situations in their career with their positive personality. Last but not the least, we provide career guidance too.

personal counselling and training

Our personal counselling and training service is aimed at assisting students to realize, improve and fulfil their potential in order to benefit from their educational environment and handle the challenges of life. We provide counselling for but not limited to: depression, anxiety, stress, low self-esteem, abuse as well as issues related to sexuality. Our counselling service can be tailored as per an individual's requirement. We conduct personal development workshop during the training.

“ User-centered design means working with your users all throughout the project.”

- Donald Norman

cctv solutions

We install major brands' advanced CCTV systems for various business firms, institutions, hospitals, houses and public utilities. Our systems are customized, ecological, economical but effective. We transform analogue CCTV systems into IP CCTV systems. Even a small system (1-16 cameras) comes with high functionality and advantages. Our installation team can deliver the CCTV units to the site and deploy it quickly.

web designing

We design websites backed up by latest technologies and features. The websites are user-friendly, customized, SEO-powered, appealing and, of course, economical. We excel in designing E-Commerce websites. Apart from this, we redesign the non-performing websites and turn them into profitable ones. Another important feature of this service is the maintenance of our clients' websites. We monitor the websites regularly and upgrade or update the contents as well as the websites as per the clients' requirement.

desktop / laptop sales and service

We sell branded desktop and laptop systems with warranty. Desktops of IBM, HP, Lenovo, Dell's, HCL etc. are sold to the customers. We sell laptops of Acer, IBM, Toshiba, Lenovo, Compaq, and HP companies. Do you want a desktop? Or computers spare parts or some other accessories? You get everything here related to computer. Besides, we build and deliver customized desktop system as per a customer's requirement. Our technical team provides repair and maintenance service to our customers. The team will scan the damaged system and give a report to the customer. Once the customer agrees, our expert technicians replace the damaged part or software with a proper one. Our service comes with a reasonable price. In addition to the service, we sell branded computer and laptop accessories with warranty.

software solutions

We provide customized software solutions services for wide range of business activities such as tourism, finance, shipping, institutes, small scale industries, big scale industries, hospitality etc. Our service includes analysis, design, development, testing, implementation and maintenance of business applications. The software is advanced, adaptable and offer web-based business process development solutions. We provide E-Commerce application, ERP and GPS solutions etc. We build, integrate and support applications for our clients so they can have increased business value, reduced total cost of operations, and quick access to market.

networking services and solutions

Network and communication infrastructure has become the foundation for IT and successful business. We provide networking services and solutions that are advanced and reliable. Our services have structured cabling, network rack installation, switches and hub installations. As per client's need, we plan the networking layout, lay the cables later. Then crimped and connections will be done and switches will be placed in rack. After the work is accomplished we hand over the network diagram to the client for future use. Our team is dedicated, dynamic, organized and professional. The team members are expert in optimization on cloud technologies and upgrading applications.

desktop / laptop / smartphone buying advisory

There are varieties of desktop / laptop / smartphone for sale in market today. For a person it is not easy to pick the right one. Hence, we assist such people by guiding them through our expertise. We consider the age, sex, profession, place, budget, brand and other criteria before advising the person to buy a particular product because computers and smartphones are not just merely used for communication or work anymore. We even suggest the right accessories for the gadgets during the purchase.

biometric attendance and access controls

We offer a wide range of attendance, access control and security related solutions. Our clientele come from various sectors like banking, data centres and server rooms, pharmaceuticals, corporate offices and hospitals. Our biometric attendance and access control installation procedure is simple and easy. The system enables our clients to save money and maintain the attendance of their employees without a hitch.

“ Our information lives will be better served when we are free to get to our information from wherever we are, with any device available.”

- Donald Norman

server installation and maintenance

Servers are the backbones of any business network and should be treated important if one wants to stay in a business and gain profit. We know this very well and hence, we provide reliable and secure server installation and maintenance service. We incorporate customized hardware and software in a server as per a client's requirements. Aided with smooth computer network, our server virtually nullifies system downtime and loss of computer data. We regularly conduct maintenance work in order to keep the application software running. We review the server's performance, make sure that automated system monitoring equipment are installed and configured properly, scan for possible security risks, and back up data at regular intervals.

social branding and network marketing

Now-a-days social branding is a new trend to popularize one's goods or service. For that purpose, one can utilize social network sites as a platform. The advantage of social branding is that a company gets an opportunity to discuss about its goods or service with the consumers directly. Based on the consumers' feedback, the company can better its product or service. We systematically do the social branding for our clients by utilizing the social network sites such as Facebook, Twitter, and Instagram etc. In addition to this, we do network marketing for our clients by applying right strategy derived from the feedback of the consumers.

professional corporate photo and video shoot

Photo and video shoot of corporate event gives publicity to the organizing company and its business. Publicity indirectly acts as a marketing tool for corporate companies. We understand this fact well and offer professional corporate photo and video shoot service to the companies. We place exclusive shooting equipment and implement latest techniques during a session that delivers output on a professional level. We almost cover every kind of corporate event such as inauguration ceremony, anniversary, sports event, cultural programmes, and social responsibility events.

computer hardware sales and service

For a computer to perform to the perfection, hardware is also as important as software. We sell hi-fi branded computer hardware including but not limited to, monitor, keyboard, mouse, headphones, printers and coolers etc. Also we sell compatible, sophisticated, and affordable computer parts such as hard disk drive, motherboard, video card, graphic card, sound card, RAM etc. The goods we sell come with warranty. Along with sales, we provide reliable computer hardware service. We thoroughly examine the malfunctioning hardware, repair or replace it with the new or compatible part. Our service team responds to and solves the issue quickly.

information technology consultancy (IT)

Information technology plays a major role in achieving one's business objectives. Hence, we advise business firms on how best to use information technology through our IT consultancy service. We also estimate, manage, implement, organize, and supervise IT systems on behalf of our clients. We boast of possessing varieties of IT consulting skills covering management, technology, business, languages and advisory etc. Our expert consultant team outlines a scope, cost and time-frame of a project, after a client states his requirement. Once the client agrees, we, from the beginning of the project till the end, assist his company and deliver the project with absolute client satisfaction.

360 Digital Plan

This service is an exclusive package combined of web design and social media marketing designed by us. The sole objective of this service is to provide every possible help to our clientele by leveraging every available means in order to accomplish their business goals effectively. We start by building a SEO-powered website; then we continue with social media marketing utilizing social media platforms such as Facebook, Twitter, Pinterest, and Instagram for one year. During this period we will conduct video marketing (advertising as well as corporate profiling) and photo shoot too. We will leave no stone unturned to see our clientele achieve their business goals and success.
