

WEB DESIGNING
REDEFINED

We design business

One of the best ways to run a successful business both domestically and globally, is to run a virtual business equipped with advanced technologies and features. We, An Idea Tech, understand this well and hence, we design business for you in the form of a multi-purpose website that serves your purpose to the fullest beyond your expectations.

Why choose us

The websites designed by us are highly advanced, user-friendly, completely customized, SEO-powered, appealing and economical. We possess many advanced skills and profound knowledge in various disciplines, required in the production and maintenance of websites. In An Idea Tech, no stone is unturned while creating a website.

The features

- Web graphic design
- UI / UX design
- Clean markup
- Utilization of advanced tools
- Privacy and security
- Implementation of analytics
- Search Engine Optimization

Give a **fresh** start

We redesign the websites which are not delivering results up to the expectations of clients. We incorporate SEO-powered content, simple but proper codes, latest UI designs, and last but not the least, HTML text and frames into those websites by utilizing advanced web resource tools. Once the redesigning is done, we monitor the performance of that website, and take necessary steps to better its performance if we find any issue.

Stay **ahead** in the race

We, An Idea Tech, take the responsibility of maintaining our clients' websites too. We monitor their performance, make necessary updates and keep them fully functional. We optimize resources in order to make your website perform fast. Hence, it will load quickly in any device. An Idea Tech offers various website maintenance packages which are result-oriented and economical. As a result, you will always be ahead of your business competitors.

80% of the population uses smart phones to browse the net.

- ✓ **Creating new web pages and features or removing existing ones**
- ✓ **Highlighting special promotions**
- ✓ **Updating site content such as text, images, illustrations and diagrams**
- ✓ **Upgrading and applying data-base and CMS**

Everything
is in a **name**

In online world, everything is in a name. Unfortunately, many people don't consider it seriously. Hence, they fail in reaching their business goals. We, An Idea Tech, aid such people so they can achieve success and prosperity. For that purpose, along with web designing and maintenance, we provide another service which most of the clients overlook. That is, domain registration and hosting. We search for proper website address as per the requirements of the clients. Once they approve, we register that domain name. After that we host their websites from a server which is best but at the same time economical too. As a result, our clients enjoy many benefits such as many email accounts, large databases etc. In case, if they face any issue we are always there to help.

Anytime Anywhere

As we said before, we will always be there for you to help. Server problem? Want to update some contents? redesigning your website? Broken links? duplicate contents? Poor readability? Navigation issues? You just tell us. Our expert team will solve your website-related issues within no time, and put your website on the track again. You can call, mail or message on our social networking page. If you decide to visit our office, we will be glad to have you with us.
